### Best Practises

#### **Title of the Practice: I: Blood Donation Camp**

##### **1. Goal:**

The College constantly endeavors to serve the deprived and the needy in the best possible manner. The institution firmly believes that any effort that would save human life is considered to be one of the best services extended towards humanity. The institution also believes that the students of this institution should be a good human being first and foremost apart from being other worldly attributes. The college desires that the students should inculcate the value of donating blood to save others life. This would also develop tendency of self-sacrifice for others and generate a feeling of human sensitivity towards fellow human beings. This ultimately develops a feeling of Universal brotherhood.

##### **2. The Context:**

Generally, it is observed that in this remote and medically under privileged area, it is found that many poor, wretched and deprived people are in dire need of the blood transfusion in emergency situations. Most of them do not have any influence or financial support to get the bottles of blood in emergency conditions. Moreover, a town like Visnagar which is almost surrounded by backward and remote villages cannot procure blood instantly in large number. Hence, our college constantly organizes blood donation camps in the campus for a time in one academic term in addition to the regular blood donation camp. Moreover, the college has nurtured a culture among the students in emergency during the normal working days. The students will volunteer themselves to go to hospital and donate blood to the needy.

##### **3. The Practice:**

Our College organizes blood donation camp at least one time in an academic year, in addition to the emergency supply of blood donor students, to various hospitals in emergency situations. Generally, the blood donation camps are organized in support with voluntary organizations and NGO's like The Indian Red Cross Society, Rotary Club, Visnagar Voluntary Blood bank and Rotract Club. In the camp most of our students participate enthusiastically and voluntarily.

##### **4. Evidence of Success:**

We feel pride to state that in all these years, in all our Blood Donation Camps, we have received tremendous response, participation and involvement from all the constituents of the society and the camps. Every time, we receive more than 25 as targeted blood bottles. These results indicate the positive Ideology, positively conveyed, implemented with commitment and resulted outstandingly. The constraint in organizing these events is the removal of the phobia among the students and the public regarding blood donation in their minds. So it requires a great effort in

motivating and preparing them mentally for blood donation camp. Once, they are made aware, the constraint automatically dissolves. Our Blood Donation Camps earn greatest credits for our college.

## **Title of the Practice: II: SCOPE**

### **1. The context that required the initiation of the practice:**

SCOPE is 'Society for Creation of Opportunity through Proficiency in English'. It is a Gujarat government initiative in collaboration with Cambridge University. On line computer adaptive examination is being held and the successful candidates are awarded Cambridge University certificates which have international relevance. Gujarat government came up with a plan to improve English of students and faculty. We, being English Department, took the responsibility of running the program and running it successfully. In the better performance and acquiring of good information, proficiency in English language is greatly required. For the students also good command over this international language is the need of the time. Without this world language the youth of today will feel himself lame. He will be proved inefficient and half literate. Good command over English language is a matter of prime concern in this highly competitive market. The government of Gujarat viewed a dream that the youth of Gujarat should be able to talk to the world in the language that the world knows. We belong to semi-urban area in Mehsana District. Majority of our students' intake is from under developed rural area. So their knowledge of English language is very poor. Hence, we decided to improve the poor language skill of our students and we started this programme.

### **2. Objectives of the practice:**

- To help them improve their proficiency in English language.
- To make them read their text books, reference books, magazines and journals in English.
- To make them able to operate computers.
- To make them able to use and get benefits of the Internet.
- To build their self confidence.
- To enhance their personality.
- To open the window of the world market for them, through the competence that they would have acquired by English language.
- To make them efficient and confident for job opportunities.
- To help them in their Research work.
- To help the teachers also to acquire more and more knowledge and information related to their subjects, for their routine teaching practice.

### **3. The Practice:**

With the above mentioned context and objectives we initiated the SCOPE Programme in our college in the year 2011. In the beginning of the year we orient the students about the aim and objectives of SCOPE, its advantages and relevance in the present scenario. We encourage them to join Only Assessment Scheme (OAS) under the course maximum in number and constantly help them in solving their problems in language learning. Thus, we make maximum efforts to strengthen their four components of language learning: Listening, Speaking, Reading and Writing.

### **4. Obstacles faced if any and strategies adopted to overcome them:**

Our college belongs to semi-urban area and the majority of our students' intake is from rural area. They don't have enough exposure to English language. So, first of all we have to try a lot to remove the fear of this foreign language. We constantly support them to learn more and more and thus remove their fear. When we overcome the matter of language learning, another problem that comes before them is about computer literacy. The SCOPE Examination is a computer adaptive test which is being conducted online. To overcome this issue students are promoted to join a computer course run by our college at a nominal fee. This course is totally free for the students who belong to BPL category.

### **5. Impact of the practice:**

Students have got the benefits of this programme. This SCOPE certificate helps the students to add some merit points when they go for job interviews. Our college staffs have also got its benefit. The students have started using the computer more. They come to the lab so often for using the net. Now they consult us more about their language problems. It shows their growing interest in English language learning. They can now read their books in English on their subjects. It has encouraged them to move a little bit away from cramming, as now they can read original text books. It has also developed some confidence in them.

### **Resources required:**

Along with the coordinator the support of the faculty in English department helped a lot to motivate the students in language learning. The computer lab and the instructor also proved very helpful to develop their computer skills. There should be more funds for running such courses which are not part of the syllabus.
